Key Responsibilities

- The Job description includes the following but is not limited to the specifications contained herein.
- Contribute to develop the investment strategy and investment plan.
- Conduct market research for investments, in close collaboration with the CIO.
- Work with brokers' analysts and industrial experts to analyze interested sectors/companies on both financial and management issues.
- Contribute and carry out due diligence and valuation analysis for investments.
- Prepare financial projections and investment proposals, present to the CIO and the Investment Committee.
- Provide recommendations on asset allocation.
- Perform portfolio data and statistics reports of different products upon requests of the CIO or Investment Committee.
- Monitor and report on the performance of the investments, provide periodical financial projections and update the performance of assigned investees.
- Contribute to the business development efforts, including observing/researching the market, and establishing of partnerships.
- Establish and maintain strong relationships with investees' executives.
- Frequently update, identify and monitor risks and recommend risk mitigation to the Risk Manager, and CEO/CIO.

Requirements

- Strong networking, negotiation, planning, problem solving, decision making, teamwork, and leadership.
- Strong business and financial analysis, financial investment laws and regulations.
- Able to work under high pressure, initiative and proactive thinking.
- Effective communication: listening, writing and presentation in both English and Vietnamese.
- Minimum 5 years in financial investment, investment fund management and financial management services.
- Strong background and work experience in financial investment, financial and banking services, CFA or master's degrees in financial investment are preferable.
